

Track site penetrations nine times quicker

Save time and money while meeting
your Penetration Register compliance
with Pentrack.™

It's easy to use and you'll have no more complicated spreadsheets and scribbles on paper to sort through.

You can add or modify penetrations directly on the plans. Plus, add photos, tracking codes, installation notes and test results.

Automatic live-updating across all your devices and users avoids the chance of duplication errors.

Export customised reports at any stage of the job. Penetration register compliance has never been simpler.

How it works

Traditionally, Penetration Register compliance has been a labour-intensive task. Often it's a mess of scribbles collected from your on-site team, complicated spreadsheets, and a high risk of duplication and errors.

With **Pentrack™, supported by Drillcut**, you can meet your compliance obligations up to nine times quicker using a simple app on a tablet or phone.

You can add or modify a penetration directly on the plans, attach photos, tracking codes, installation notes and test reports – all at once.

The plans update instantly across all your user accounts, avoiding the chance for duplication errors and allowing you to monitor site installations in real-time.

Pentrack™ will reduce your risk while saving you time and money.

Available on iPads, iPhones and all web browsers

Pentrack is the powerful cloud based system that will change the way you monitor your on-site installations and manage your compliance risks.

At any stage, you can view, export and share a complete report, making penetration register compliance easier than ever before.

Pentrack™ makes your life easier...

- Create complete registers or prebuild submissions
- Track multiple job sites and build company wide 'libraries'
- Remotely highlight defects in real-time, limiting chances for call-backs
- Work online and offline where data connections are limited.
- Add product notes quickly by selecting from a huge range of pre-loaded product options

Find our more at pentrack.com.au or call us today on **1800 374 552** for a free demo.
