

Simplicity is key! **BOSS FyreBox™** provides 2hrs of fire protection for bundles of services in one integrated box.

Offering major benefits to typical apartment projects or applications requiring multiple services to be fire rated in one confined space.

BOSS FyreBox™

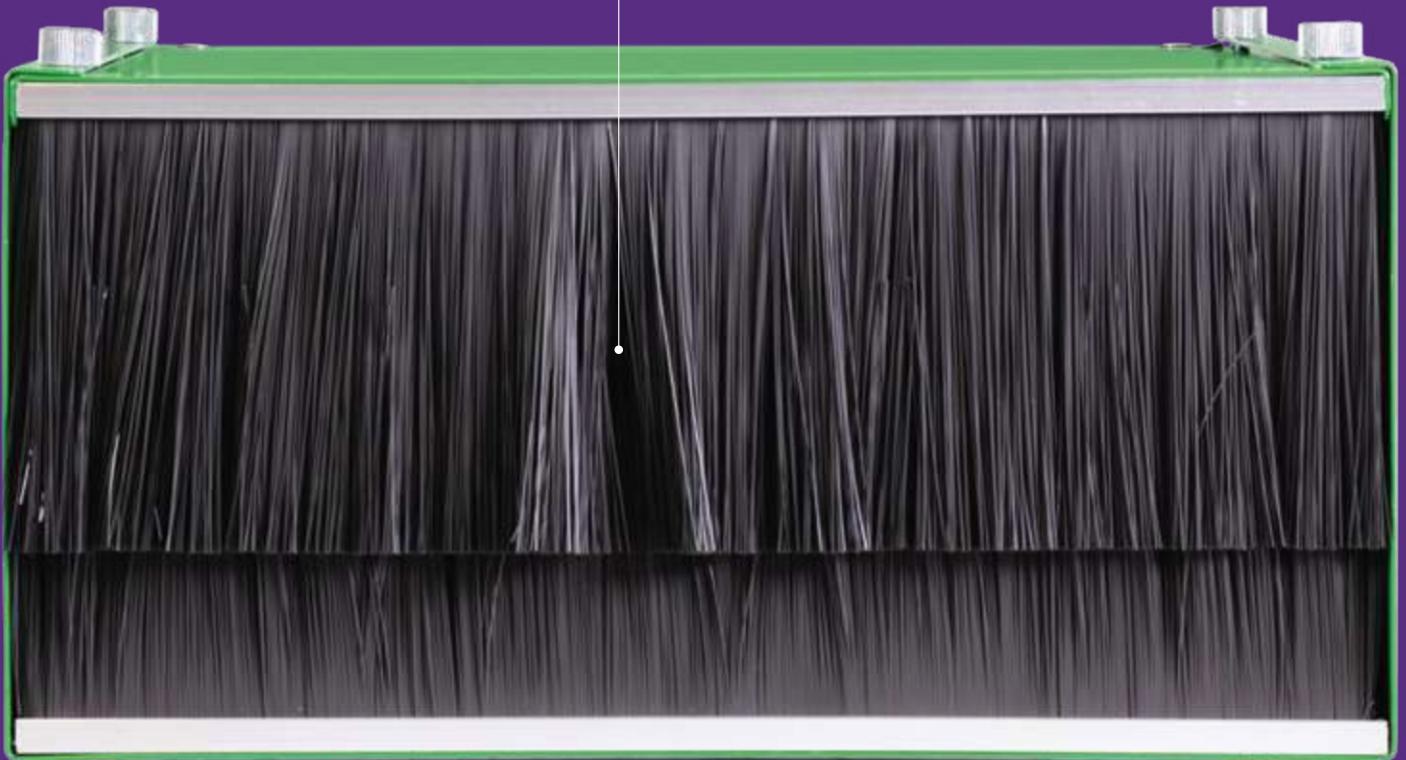

Think Inside the Box™

Suitable for

- Apartment walls in high-rise residential projects
- Hospitals and Aged-Care
- Computer rooms and data centres
- Corridors where services pass through multiple fire walls
- Riser shaft walls to common areas
- Studios and broadcasting where cables are changed regularly
- Commercial or industrial buildings where services are bundled or require frequent changes

Protects all in one opening

- Multiple PEX & PEX-AL
- Steel Sprinkler Pipe
- HVAC Paircoil
- Multiple Power Cables
- Data Bundles, TV, Security & Fire Cables

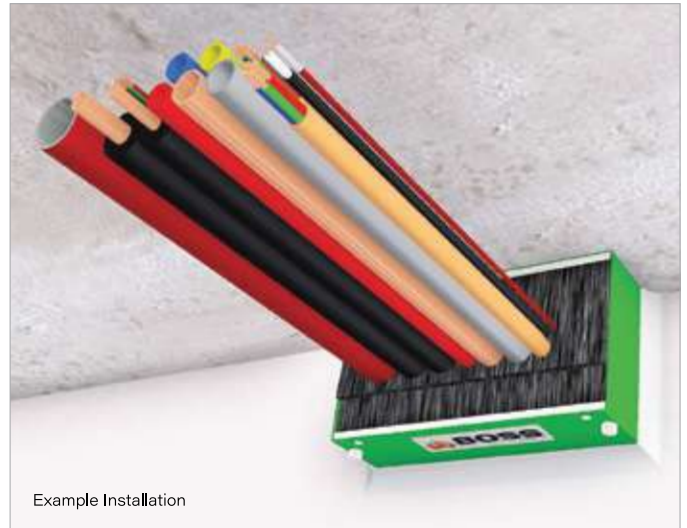

VERY EASY INSTALLATION

Installation of the BOSS FyreBox™ is the fastest method of fire rating a cluster of services through a confined space on a fire wall. It comes in two pieces that can be clipped together and installed quickly prior to wall construction. It also features BOSS's unique Cable Support Trapeze to assist with heavy services or a fully loaded FyreBox™.

For complete peace-of-mind, choose the BOSS FyreBox™ for firestopping reliability and quality.

Simple to install and offers higher performance on more services than ever before. BOSS's own unique FR Brush Seal™ eliminates over 90% of installation time. Combined with advanced intumescent "FireMastic-HPE" sealant, the Australian-made BOSS FyreBox™ guarantees a fast-acting reaction to fire, closing rapidly around the penetrating services.

FIRE RATED MULTI-SERVICE CABLE & PIPE TRANSIT

Designed for complex fire rating applications the BOSS FyreBox™ has been designed in conjunction with some of Australia's leading construction design firms. It offers major benefits to the typical apartment project or any application requiring multiple services to be fire rated in confined spaces.

BENEFITS

- Consolidates fire rating of multiple services into one simple-to-install device
- Services can be installed before or after the wall goes up, making scheduling of trades a breeze
- Simple to add/remove services after installation without disturbing the FyreBox™
- Approved on the full range of apartment services
- Tested and approved to 2hrs with an FRL of -/120/120

- ✓ Guarantees compliance every time
- ✓ Reduces 90% of installation costs
- ✓ Bundles apartment services to one penetration
