

Drillcut's **Puddle Flange** is an all in one fire collar and recessed puddle flange that can be installed in a matter of seconds.

PUDDLE FLANGE-IN-A-BOX

Stocked to suit 160mm or 180mm slab heights, it is a huge time saver, eliminating the messy cut, prime, glue processes, and reducing the need for unnecessary lengths of PVC piping on site.

The fire collar is the market leading Snap collar.
