

**valsir**[®]

The **MFV System** is a revolutionary prefabricated dry wall incorporating all back of wall plumbing and drainage ready to be easily installed in apartments, hotels, houses and offices saving you both time and money.

Supplied fully engineered, prefabricated, pre-plumbed and tested. Just install, connect and fit-off once tiling is complete. No special tools required - Job Done!

Fast and easy installation system for sanitary fixtures

valsir[®]
MFV MODEL

The frames of the sanitary structures are made entirely of galvanized steel and incorporates a rapid anchor system that, by means of a lever, allows it to be positioned simply and rapidly and then adjusted in height.

**TIME SAVING**

This system provides significant on-site time saving compared to traditional construction methods.

**ON-SITE CLEANLINESS**

No demolition or restoration work required.

**UNIVERSAL SYSTEM**

Can be Installed on any wall type.

**VERY EASY INSTALLATION**

No special tools are required making all installation work carried out by the plumber a simple task.

**SYSTEM VERSATILITY**

The MFV system is universal and can be installed on any wall type and with an infinite number of configurations.

**COMPLETE RANGE**

To provide maximum customisation the MFV system has the complete range of accessories available.

**RECOGNISED INNOVATION**

7 international patents for an innovative and advanced system.

WE ARE BIM READY

The modelling process that allows the improvement of planning, design, construction and the management of buildings, concurring with the transition of the industry toward the digital representation of buildings.

“BIM oriented” planning offers extraordinary competitive advantages: greater efficiency and productivity, fewer errors, less downtime, lower costs, enhanced interoperability, maximum sharing of information, a more punctual and coherent supervision of the project.

We achieve this by creating a series of Revit applications and models designed for simple and fast use.
